Sri Rajadurai

+91-6380106430 | srivimalraj0888@gmail.com | Portfolio | linkedin.com/in/srirajadurai/

PROFILE

B.Tech graduate in Electronics and Communication Engineering with a strong foundation in Java and hands-on experience in full-stack web development. Possess a solid understanding of programming fundamentals in C, C++, JavaScript, and Python, with practical exposure to backend development, databases, and software-hardware integration.

EDUCATION

Sri Manakula Vinayagar Engineering College   *2021 - 2025*
Bachelor of Technology in Electronics and Communication Engineering   CGPA: 8.76

Amalorpavam Higher Secondary School   *2020 - 2021*
Higher Secondary in Computer Science   Percentile: 94.57

SKILLS AND INTERESTS

Programming Languages: Java, SQL, C, C++, JavaScript, HTML, CSS
Familiar With: OOPs, SpringBoot Framework, Java Collections, Linear DSA
Tools: IntelliJ, VS Code, Multisim, Postman, MySQL Workbench, Word, Powerpoint

CERTIFICATIONS

- Programming using Java by Springboard, Infosys – Aug'24
- Programming in C by Cisco – Nov'23
- Data Structures and Algorithms using Java by Springboard, Infosys – Aug'24

EXPERIENCE

Tata Consultancy Services   *Kerala, India*
ServiceNow Developer Intern   Mar 25 – Apr 25

- Gained hands-on experience in ServiceNow development through an online internship, working with client scripts, business rules, and ITSM workflows.
- Collaborated with teams to implement automation solutions for service management processes.
- Built a strong understanding of Incident Management and CMDB modules in a remote agile setup.

PROJECTS

Hybrid Metaheuristic Approach for NLOS Vehicle Localization   Sep 24 – March 25
MATLAB, ACO, SA

- Designed a hybrid metaheuristic approach using Ant Colony Optimization and Simulated Annealing to improve vehicle localization in NLOS conditions within VANETs.
- Reduced communication latency by 20% and improved message delivery reliability through algorithm optimization.
- Validated results via MATLAB simulations, showing enhanced accuracy in urban vehicular networks.

Retail Billing System   May 25 – June 25
Java, SpringBoot, HTML, CSS, JavaScript, MySQL

- Developed a full-stack retail billing system using Spring Boot, HTML/CSS/JavaScript, and MySQL for backend, frontend, and database management.
- Implemented product management, sales tracking, invoice generation, and secure user authentication features.
- Designed a database to efficiently manage 500+ products with reliable transaction logging and reporting.

ACHIEVEMENTS

- Successfully completed the Java Programming, Intermediate Level Test on HackerRank
- Received the 50 Days Coding Badge from LeetCode for consistent coding practice.
- Awarded First Prize in Robo War competition at Hindustan College among 1000+ participants
